## Advantage

- Speed up the buying process and save time for customers
- Makes wider options for customers than to buy products from physical store
- Saves costs for the business owner for employees that can be replaced with virtual support
- Easy to retarget customers. For example, with coupons, left e-mail addresses, google search analysis

## Advantage

- Easy to encourage impulsive purchases
- Available reviews and recommendations
- Available detailed information about the product
- Possibility to lower costs due to cutting physical store rent, staff, store design etc.
- Quicker marketing because it is easier to pull eCommerce business into online marketing
- Flexibility for customers to shop 24/7

## Advantage

- Less store set up costs and quicker return of investments
- Quicker training for new employees because all information about products is already given
- Less human errors on eCommerce owners' side
- Possibility to easily compare products and prices
- No geographical limits

## Disadvantage

- Lack of personal touch
- Insecurity about the quality

## Disadvantage

- Possible late delivery due to third parties
- Insecurity about personal information
- Very competitive business because of the growth of online stores
- Mostly there is no possibility to receive a sample or to try on
- Site crashes
